

Abhimanyu Arya

Senior Product Designer

abhimanyu.arya@gmail.com | +91 9599698106 | Bangalore, India | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Senior Product Designer with **4+ years** who builds products from zero, diagnoses what breaks, and ships solutions with numbers to prove it. Worked across EdTech, FinTech, and Enterprise SaaS — from **0→1** platforms serving **50K+** users to growth funnels, live systems, and enterprise workflows. Solves complex product problems through field research, systems thinking, and iteration. Uses AI daily to move faster without losing judgment.

WORK EXPERIENCE

Allen | *Senior Product Designer*

Apr 2023 – Jan 2026 | Bangalore, India

Live Class Pod – Mobile & Web

- Built Allen's live class platform **0→1** — primary designer (no design lead above) across mobile and web, from field research and MVP through to full scale serving **50K+ students** and **8K+ teachers**.
- Post-MVP, diagnosed an engagement drop (**38→25%** attendance, **28→18 min** avg session) through live observation; designed structured doubt resolution workflows as first fix — recovering attendance to **47%**, session time to **32 min**.
- Added session-scoped leaderboards to sustain momentum — lifting attendance to **62%**, session time to **38 min**; final scale: **72% attendance, 44-min avg sessions**.
- Designed one cohesive system for two opposing users — teachers (speed, control, predictability) and students (participation, motivation) — through separate personas, journeys, and IA within a shared platform.
- Ran field research with **30+ teachers** across two cities; used AI to cut synthesis time **~40%**; contributed design system components reducing handoff effort by **25%**.

DoubtNut Pod – Growth & Conversion

- Redesigned content discovery and homepage to reposition DoubtNut from a doubt-solving utility to a learning ecosystem — **3x engagement lift**; redesigned video thumbnails via user research and A/B testing, improving **CTR 2x**.
- Rebuilt course purchase journey — surfacing teacher credibility, syllabus, pricing, and testimonials before commitment — contributing to **2x sales and revenue growth**.
- Optimized lead qualification funnel using progressive forms and A/B testing — reducing low-intent leads from **1,000 to 120/day** while scaling high-intent conversions from **15 to 50+/day**.

Navi | *Product Designer*

Jun 2022 – Feb 2023 | Bangalore, India

- Redesigned health insurance renewal flows, reducing dependency on call-assisted renewals; improved in-app renewal rate **68→95%** and early renewals **12→40%** through proactive reminders and pre-filled renewal journeys.
- Simplified Super Top-up insurance through scenario-based value communication and improved interaction affordance — driving **3x sales growth** and **2x login growth**; designed trust-critical error states for all payment failure paths.
- Collaborated across product, research, engineering, and business in agile squads, aligning UX decisions with behavioral insights, delivery constraints, and commercial goals.

PeopleStrong | *User Experience Design Intern*

Jan 2022 – May 2022 | Gurgaon, India

- Designed enterprise HR workflows (leave management, performance reviews) for **50K+ global users**; reduced task completion time **30%** in moderated usability testing by consolidating multi-screen approval flows into single-view decision panels.
- Authored **RTL UX** and **WCAG 2.1 AA** accessibility guidelines for Middle East localization — covering directional icons, bidirectional text, form alignment, data tables, and animation direction.
- Contributed to research synthesis, UX standards, and system-level design guidance across multiple enterprise product surfaces.

EDUCATION

M.Des (Experience Design) | *National Institute of Fashion Technology*

2020 – 2022 | New Delhi

BFA (Visual Communication) | *College of Art, Delhi University*

2015 – 2019 | New Delhi

SKILLS

Product Design: User Journeys, UX Flows, Interaction Design, Information Architecture, Wireframing, High-Fidelity Prototyping, Low-Fidelity Prototyping, Responsive Design, Mobile Design.

Research & Optimization: User Interviews, Usability Testing, Field Research, Funnel Analysis, A/B Testing, Metrics Interpretation, Insight Synthesis, Conversion Optimization.

Design Systems: Component Libraries, UI Consistency, Design Governance, Documentation.

Collaboration: Cross-Functional Teams, Agile/Scrum, Stakeholder Alignment, Design Critiques, Workshop Facilitation, Engineering Handoff.

Tools: Figma, Sketch, Framer, Adobe Illustrator, Adobe Photoshop, ProtoPie, InVision, Rive, Miro, Notion, Jira.

AI Workflow: ChatGPT & Claude (ideation, research synthesis), Notion AI (documentation), Figma AI & Figma Make (rapid prototyping), Lovable & Vibe Coding (front-end prototyping).
